[illegible] 5. de compositione medicamentorum secundum locos cap. 4. de Hemophtoicorum curatione haec dicit: In reiectatione sanguinis primum periculum est, ne immoderata eius evacuatio fiat. secundum vero post suppressum sanguinem. Curatio autem eius quidem, quae ex apertione osculi alicuius vasis contingit, per obturationem fit oris dilatati; eius vero, quae ex vasis ruptura, per eiusdem conglutinationem, quemadmodum eius, quae ex erosione, per renutritionem erosorum. obturatur igitur osculum dilaratum per adstringentia; conglutinatur autem ruptum per eadem, et quaecunque ipsis in compositione miscentur, citra mordacitatem, resiccantia et glutinosum quiddam habentia veluti est terra Lemnia, et Samius aster. Renutriuntur autem corrosa per cibos boni succi, et pharmaca carnem gignentia, sarcotica Graecis appellata. haec Galenus.
